

What's New?

May 24, 2021

Howdy Pards and Pardettes,

WEEEELLLL HOWDY!! We sure did have a great turnout for the May shoot. All these great shooters showed up and we had a great time! It was a little muggy so we had the “cowboy air conditioning” out for the benefit of the shooters.

The range was particularly difficult to whip into shape this month! Lots of weed whipping, grass cutting, animal damage, and stick burning had to happen! But the board members got ‘er dun! Between the neighbor’s cattle getting in and messing things up, we had to deal with a badger that decided to dig five big holes at different places up and down the range! Not to mention the raccoon family that lives in a tree in the parking lot! Maybe we should call it “Raccoon City” because they seem to have taken over.

We tried out the “pig launcher” this month and it seemed to work well. We didn’t count misses this month on the rifle for that stage because it was hard to tell if the target got hit. However, we think we might be able to count misses on that in the future. Most hits were obvious and lots of people were getting good at tracking the moving target.

Lots of folks got bargains this month at the cowboy flea market. Ammo, clothes, etc.

Anyone who wants to help at the Range, please do not hesitate to let Lenny (Spenerdy) know. Also, members are always invited to come to the range the Saturday before the shoot to help us prepare it for the shoot itself. And you are welcome to use the targets and facilities for practice at that time. We need weed whippers and grass mowers and target help!

As we get into the hottest part of the summer, expect the stages to be fast and close without a lot of extra effort. We will still have our shade and fans and we provide bottled water. If you need to eat lunch, please bring it with you as we don’t provide lunch.

Your Pard,

Surly Bob
Marshal, Nebraska Territorial Rangers

And Remember:
“Don’t name a cow you plan to eat.”
And
**“Be thankful we’re not getting all the government
that we actually pay for!”**
